<h2 style="font-size:26px">How does this medication work? What will it do for me?</h2>

Atorvastatin belongs to the group of medications known as<i>HMG CoA reductase inhibitors ("statins")</i>or<i>lipid metabolism regulators.</i>It is used totreat people who have high cholesterol levels,including those people who have certain inherited cholesterol disorders. When you use this medication, you also need to make lifestyle changes, including switching to a diet low in fat and cholesterol, quitting smoking, and increasing the amount of exercise you do.
